Dear Parents,

Please join us for an Informative session dedicated to understanding puberty and the changes students experience during this crucial time. The session will be focused on Comprehensive Sexuality Education (CSE), adolescent psychology, and the transformations occurring between ages 13 to 18.

The goal of the session is to foster open communication within families by examining personal attitudes toward discussing puberty with preteens. Practical strategies for handling challenging questions and introducing age-appropriate topics sensitively will be shared and discussed.

Your active participation will be highly appreciated.
